**Korbyt Receives SOC 2 Type II Attestation**

Independent Audit Verifies Korbyt's Internal Controls and Processes

**Dallas, TX - August 31, 2022** - [Korbyt](#), a company whose award-winning omnichannel communications platform engages hybrid employees, students, guests and retail customers, today announced that it has completed its SOC 2 Type II audit, performed by [KirkpatrickPrice](#). This attestation provides evidence that Korbyt has a strong commitment to security and to delivering high-quality services to its clients by demonstrating that they have the necessary internal controls and processes in place.

"Achieving SOC 2 Type II compliance is an important milestone in reaffirming our commitment to data security, and extending operational best practices across our organization," said Korbyt CEO Ankur Ahlowalia. "Undergoing this rigorous assessment and abiding by very strict privacy standards ensures that our customers' data is protected, and preserves the integrity of the systems that underpin our platform."

A [SOC 2 audit](#) provides an independent, third-party validation that a service organization's information security practices meet industry standards stipulated by the [AICPA](#). During the audit, a service organization's non-financial reporting controls as they relate to security, availability, processing integrity, confidentiality and privacy of a system are tested. The SOC 2 report delivered by KirkpatrickPrice verifies the suitability of the design and operating effectiveness of Korbyt's controls to meet the standards for these criteria.

"The SOC 2 audit is based on the Trust Services Criteria," said [Joseph Kirkpatrick](#), President of KirkpatrickPrice. "Korbyt delivers trust-based services to their clients, and by communicating the results of this audit, their clients can be assured of their reliance on Korbyt's controls."
